

I am strongly against any legislation that will weaken Indiana's Telephone Privacy Law.

I cannot express my satisfaction with the results that this law has had on my privacy. I no longer have to "screen" all of my telephone calls. Telephone solicitation is not a method of doing business that I have ever used, or will ever use.

My privacy is very dear to me. If I want to purchase something, I will shop for it. I do not need anyone to tell me what I do or do not need.
